The talento 121.1 is a substitute for the MIL 2008 SF1Hu

The SF1Hu (pictured on the left) is no longer manufactured. The new Talento 121 is the current equivalent, and provides the same type of control. Basic differences are the mounting style, and the override – the MIL 2008 has advance ON / OFF (self-resetting). The Talento has fixed ON / OFF (permanent setting) The Talento product is for din-rail mounting, but optional accessories include a surface-mounting enclosure, and a panel mounting kit.
